SINGTEL GROUP ENVIRONMENTAL POLICY

The Singtel Group is committed to understanding, managing and minimizing the environmental impact of our business investment, operations, products and value chain.

TO ACHIEVE OUR COMMITMENT, WE WILL:

- Establish clear roles and responsibilities, and set objectives and targets within the business and relevant stakeholders to monitor, measure and improve our environmental performance.
- Identify, assess and manage all material aspects of our environmental impact.
- Actively monitor and comply with relevant environmental compliance and legislative requirements.
- Continually improving our environmental performance and minimising our impact. We will use energy, water, and other resources efficiently, and promote the reuse and recycling of water and waste.
- Reduce our GHG emissions through use of technology, process improvements, energy optimisation, efficiency measures and supplier/investee engagement.
- Adopt plans and measures throughout our operations and infrastructure to adapt to and build resilience to the longer-term risks of climate change.
- Promote a culture in which all employees share our commitment in achieving our environmental objectives and targets.
- Incorporate environmental considerations into our everyday business decisions, actively working to prevent pollution and protect biodiversity where relevant.
- Monitor and report on our environmental progress and performance in our annual sustainability report.
- Engage and collaborate with stakeholders in our value chain to review and improve their environmental performance including compliance.
