Connected Intelligence

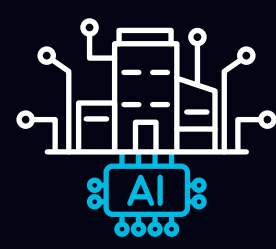

Where connectivity, security and AI converge

As AI reshapes industries, enterprises need a robust, intelligent network to support growing workloads.

This means creating seamless connectivity across fixed and mobile domains—ensuring efficiency, security and scalability for AI wherever it resides.

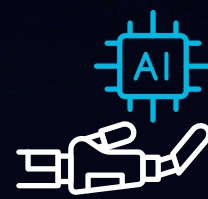

AI network fabric spending to grow **34% CAGR** in the next five years to reach **USD 3 billion by 2029**¹

On-premises AI market will grow to **USD 23.7 billion by 2028, CAGR of 15.9%** driven by data privacy, low latency and customised AI solutions²

40% will choose to work with MSSPs, offering an integrated security solution to **simplify complexity**³

AI agents will be implemented in about **60% of IT operation tools by 2028**⁴
