Singtel | DART

Supported by CSA SINGAPORE
Cyber Security Agency of Singapore

Critical Information Infrastructure (CII) Advanced Persistent Threat (APT) Detection & Response Programme

Ignite the Change
Hello Possibilities

Practitioner technical programme

Protect what keeps Singapore running

Developed by Singtel and DART with support from CSA, this five-day programme equips CII practitioners with practical skills to detect, investigate and respond to sophisticated cyber threats across dedicated IT and OT tracks.

5 hands-on days

2 tracks:
IT + OT environments

1 simulated CII investigation

Build practical readiness across IT and OT

From threat intelligence to incident response: practise the full defence journey

CII teams need more than theory. Through practical exercises and simulated environments, this programme trains practitioners to identify threats earlier, investigate with confidence and respond effectively.

IT ENVIRONMENT

- Threat intelligence and APT analysis
- Network forensics and anomaly detection
- Identity controls, segmentation and Zero Trust principles
- Detection engineering and lateral movement analysis
- Incident response and disaster recovery

OT ENVIRONMENT

- Threat hunting in critical environments
- OT network architecture and vulnerable protocols
- OT asset inventory and risk prioritisation
- Segmentation, remote access and Zero Trust principles
- Industrial control system hardening and response

5-day practitioner learning journey

Day 1	Day 2	Day 3	Day 4	Day 5
Threat intelligence and attacker tradecraft	Practical threat hunting	Architecture and risk assessment	Detection and forensics	Incident response and assessment

Programme fee:
S$8,000 per participant before subsidy. Eligible enterprise can receive up to 70% subsidy*.

Build defence readiness against sophisticated threats.

About Singtel

Singtel Group is a leading Asia-based connectivity, digital infrastructure and services company with businesses and strategic investments globally that serve consumers, enterprises and governments.

The Group's telecoms businesses include Singtel Singapore, Optus and regional associates Airtel, AIS, Globe and Telkomsel. Together, they give Singtel a significant footprint across Asia Pacific, India and Africa, reaching over 839 million mobile customers in 20 countries.

Its digital infrastructure business includes regional data centre arm, Nxera, and a joint investment with KKR in STTGDC. Digital services arm, NCS, complements this infrastructure with enterprise technology and AI solutions, while sovereign AI cloud RE:AI brings together Singtel's AI capabilities.

As it powers the digital and AI economy, Singtel is dedicated to driving innovation and transformation to create new and exciting customer experiences, support enterprises in their digital transformation and shape a more sustainable, digital future.
