# Singtel

Product Brochure
Singtel Liquid-X
Simplify your network to do more

Singtel Liquid-X is a portfolio of cloud centric services that reduce network complexity by simplifying networking to accelerate cloud and digital transformation for today's future-ready enterprise. With it, your organisation can improve operational efficiency, capture opportunities in both new and evolving markets, and fully deliver new products and services.
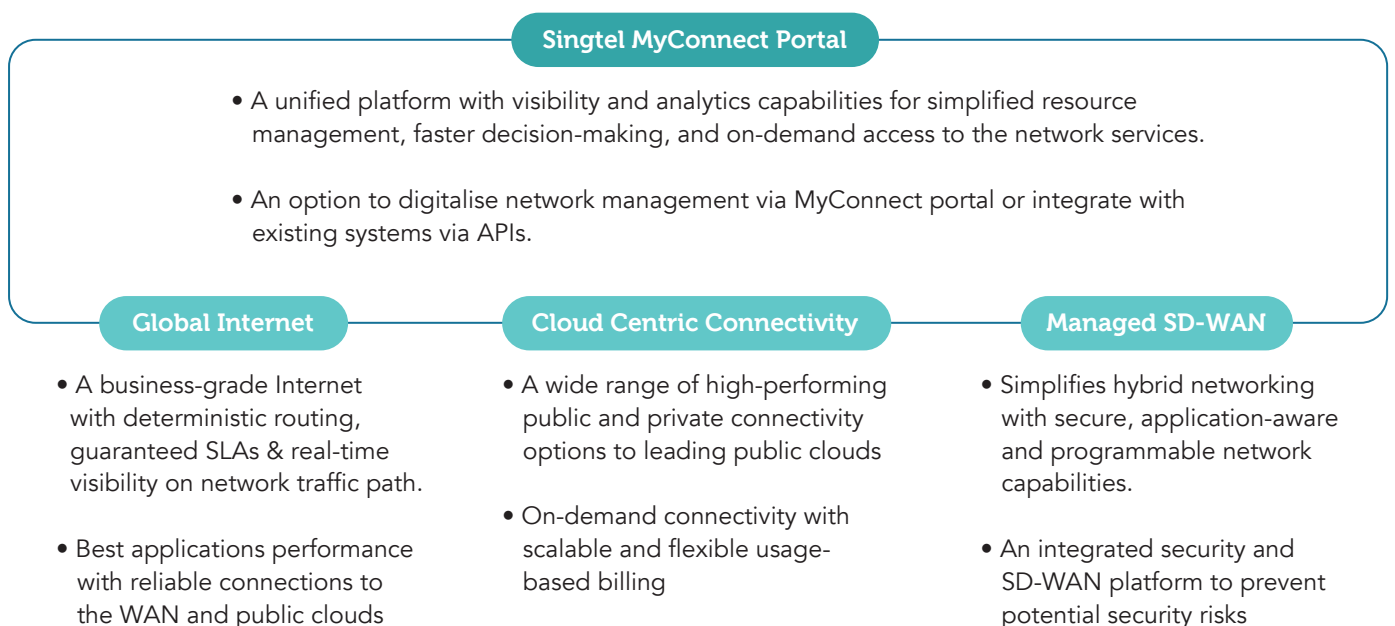

Singtel Liquid-X

The time for transformation is now. With the rise of the mobile workforce and increased emphasis on digital transformation as a key necessity, enterprises are shifting business-critical applications across multiple clouds to rapidly meet with evolving demands and be positioned for greater innovation. As network services shift to be more software-defined and cloud-powered, enterprises today will have to rearchitect their network for greater visibility and control to achieve business agility and flexibility.

Needs of enterprises

Speed
Increasingly tech-savvy users expect fast and frictionless experiences

Convenience
Users are increasingly mobile and expect connectivity at anytime, anywhere and on any device.

Security
Users believe that the responsibility of protecting their data lies with the business they are interacting with

Expectations of networks

Agility
Networks must be able to respond to quickly changing needs

Adaptability
Networks must be equipped to scale in an inexpensive manner to accommodate users and demand surges

Visibility
Networks must possess end-to-end analytics capabilities for performance monitoring and security reporting

Singtel Liquid-X

Singtel Liquid-X simplifies connectivity to the cloud, deploys and manages a secure network environment, monitors and troubleshoots systems for lapses, and is well-positioned for your global expansion.

Singtel MyConnect Portal

- A unified platform with visibility and analytics capabilities for simplified resource management, faster decision-making, and on-demand access to the network services.

- An option to digitalise network management via MyConnect portal or integrate with existing systems via APIs.

Global Internet

- A business-grade Internet with deterministic routing, guaranteed SLAs & real-time visibility on network traffic path.

- Best applications performance with reliable connections to the WAN and public clouds

Cloud Centric Connectivity

- A wide range of high-performing public and private connectivity options to leading public clouds

- On-demand connectivity with scalable and flexible usage-based billing

Managed SD-WAN

- Simplifies hybrid networking with secure, application-aware and programmable network capabilities.

- An integrated security and SD-WAN platform to prevent potential security risks

Features

Simple to connect to clouds
- Enhance your multi-cloud infrastructure with a secure and direct connection - covered by SLAs - to leading cloud providers
- Deterministic Internet routing capabilities ensure predictable and consistent cloud application performance
- On-demand connectivity with scalable bandwidth and flexible usage-based billing

Simple to monitor & troubleshoot your network
- Monitor network with a single portal that provides consistent user experience and end-to-end visibility across networks and cloud services
- Optimise, troubleshoot, and dynamically orchestrate network resources with predictive and real-time network analytics and alerts that diagnose IT issues.
- Simplify IT management with network intelligence and a centralised policy management over applications

Simple to deploy & manage your network securely
- Fully managed SD-WAN service removes the complexity of managing a hybrid network
- Spin up branches instantly with a vendor-agnostic solution
- Mitigate risks with integrated security service

Benefits

Greater agility by being able to easily transit to a hybrid and cloud environment

Accelerate transformation with seamless and secure connection to leading cloud providers and data centres

Reduce IT complexities to free up precious resources

Raise visibility and control over your network

Why Singtel

Well-positioned in Asia with an extensive global presence
Tap on 428 Point of Presence (PoPs) in 362 cities, 30 cloud access gateways and global internet support in over 200 countries.

Security by design
Singtel takes a security-first approach in everything we do with the integration of cybersecurity expert Trustwave, a Singtel brand.

Trusted ICT partner with a proven track record
Singtel is recognised as Asia's leading ICT provider by IDC and has gained recognition from industry-leading analysts

About Singtel

Singtel is Asia's leading communications technology group, providing a portfolio of services from next-generation communication, technology services to infotainment to both consumers and businesses. For consumers, Singtel delivers a complete and integrated suite of services, including mobile, broadband and TV. For businesses, Singtel offers a complementary array of enterprise mobility solutions, data hosting, cloud, network infrastructure, 5G, IoT, analytics, robotics and cyber-security capabilities. The Group has presence in Asia, Australia and Africa and reaches 700 million mobile customers. Its infrastructure and technology services for businesses span 21 countries, with more than 428 direct points of presence in 362 cities.
