

Boosting cyber resilience across your business

Singtel Cyber Elevate is a holistic one-stop training and cyber incident management programme. It is designed to help businesses develop the necessary competencies to address cyber security risks and respond effectively to breaches when they occur.

The cyber threat landscape in Singapore*

70,200
infected systems

132
ransomware cases

4,100
phishing attempts

* Cyber Security Agency of Singapore, 2024

During a cyber crisis, Singtel Cyber Elevate supports your organisation:

People

Drew & Napier

- Data Protection Policies
- Cloak Of Privilege

Processes

Blackpanda

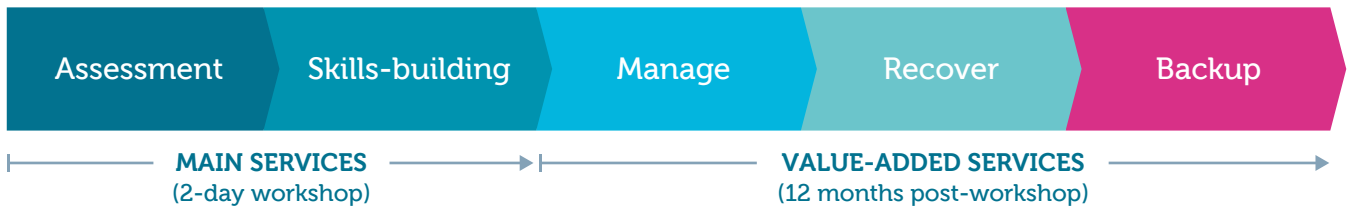

- Incident Response Plan
- Forensics Investigation

Technology

Singtel

- Cloud Backup
- Singtel Awareness Education

The path to greater cyber resilience

Assessment

In the assessment phase, your business will be guided through a self-declarative cyber health check based on the Cyber Security Agency (CSA) of Singapore's Cyber Essentials Framework, to ascertain your risk posture.

Awareness

Employees will gain real-world knowledge about cyber security and foster good cyber hygiene practices through an online Security Awareness Education (SAE) module with built-in phishing simulation.

Workshops provide employees with guidance on legal compliance and hands-on practice in cyber crisis management, post-incident recovery and incident response planning.

Management

In the event of a security attack, a one-time activation of post-breach legal assistance will give your business access to legal advice and guidance on handling potential civil claims to minimise legal liability and financial damage.

Recovery

A one-time activation of post-breach digital forensics will give you access to incident response practitioners who will work closely with your business to contain the breach, eradicate malware and recover affected systems, and provide recommendations for further remediation and security improvements.

Singtel will also provide unlimited email backup to a secure cloud, to facilitate restoration of email data and files.

\$27,000 per organisation¹ **70% OR 90%** SkillsFuture funding²

- 2-day workshop on cyber breach workflow conducted by experienced legal and incident response practitioners
- Security awareness education via e-learning
- Cyber health check

FREE value-added services
